

MASTER 2 IN ECONOMIC EXPERTISE AND INTERNATIONAL PROJECTS MANAGEMENT

A Mater degree delivered by Paris-Est Creteil University

This programme's objective is to train professionals taking part in Official Development Aid (ODA) programmes for developing or emerging countries. The programme is organised in close collaboration with consulting enterprises. The teaching staff comprises both high level academics and professionals of the consulting business, as well as economic experts in the field of development, including working in International Organisations. The programme is supported by the World Bank.

Career objectives and opportunities

After graduation, students master the know-how needed in all phases of the project cycle typical of ODA programmes. This includes understanding the rationale of ODA and the mechanism of tenders, the process of drafting terms of reference by donors and beneficiary countries as well as the bidding of consulting companies; it also includes the skills of managing a project in a developing country with its specific culture and the economic expertise needed to implement a programme of technical assistance in the most relevant socio-economic fields.

Graduate students access positions of (junior) economic expert, consultant, (assistant) project manager, in consulting firms, development-oriented NGOs, research departments of banks, international organisations etc.

Curriculum

The EEIPM Master is a one year program in economics and management. It includes an internship and the writing of a professional thesis.
